

PES-CHEM 555 PESINOX

PES CHEM 555 Pesinox is an anti-corrosive encapsulation system which provides a safe way of protecting metallic or cementitious surfaces without the need to remove old hazardous coatings.

The single component product is water based and therefore classed as non-hazardous. It can be applied to manually prepared surfaces by brush, roller or conventional airless spray equipment.

The product is rapid curing and shower resistant within 30 minutes at 68°F (20°C).

Features of the product include –

- | | |
|--|--------------------------------|
| Simple to use | Water based |
| High build protection | Excellent corrosion resistance |
| Application by brush, roller or spray | Seamless lining |
| Good adhesion to concrete and steel surfaces | UV stable |

Benefits to the user include –

- | | |
|--------------------------------------|--------------------------|
| Long term protection of key assets | Cost effective |
| Reduced downtime of production areas | Reduced life cycle costs |

Typical Applications include –

External tank surfaces, structural steel and concrete

External tank surfaces

Structural Steel

Pipework

Process Equipment
